

Postgraduate studies program “Sustainable Landscape Projects”

The Department of Agricultural Technology of the Technological Educational Institute of Epirus (member of the Uniscape Network <http://www.uniscape.eu/>) implements for the academic year 2016-2017, the Master of Science Program titled “Sustainable Landscape Projects”. The organization of the program and the general admission requirements are regulated by the GG B' 272 12 Feb 2016 No. 520 and the Institute Studies Regulation.

Studying in the Postgraduate Program leads to a complete comprehension of the landscape projects management which includes the legal framework, current scientific and technological developments and the methodology, policies, techniques and tools for a rational and finally sustainable management of landscape projects.

The study program requires three (3) semesters and includes nine (9) studying courses. The Program leads to the award of a Master of Science (M.Sc.). Acceptable diplomas, by priority, are from Agricultural and Agricultural Technology of all Departments of national Universities, Technological Institutes and Higher Faculties or from equivalent recognized foreign Educational Institutes.

The deadline for submit an application is the 31st August 2016
